

AI CRM Lead Qualification Voice Agent

GitHub Repository & Project Documentation

Recommended GitHub Repository Name

ai-crm-lead-qualification-voice-agent

Repository Description

AI CRM Lead Qualification Voice Agent using Vapi, n8n, HubSpot, Google Calendar, and Gmail with BANT-based lead scoring and automated meeting scheduling.

BANT Lead Scoring

High: Budget $\geq$ \$5,000 AND timeline $\leq$ 3 months.

Medium: Budget $\geq$ \$2,000.

Low: All other cases.

Workflow Tools

qualify_lead — evaluates Budget, Authority, Need, and Timeline.

update_crm — creates or updates the HubSpot contact.

check_calendar_slots — retrieves available meeting slots.

schedule_meeting — books the selected slot.

send_confirmation — sends the confirmation email.

Repository Structure

```
ai-crm-lead-qualification-voice-agent/  
├── README.md  
├── n8n/  
│   └── workflow.json  
├── vapi/  
│   ├── assistant-prompt.md  
│   └── tool-definitions.md  
├── screenshots/  
├── docs/  
│   └── implementation-notes.md
```

Demo Test Scenario

Use a High-score lead: Shaik Shaheed, Apex Technologies, your real test email, \$10,000 budget, decision-maker authority, AI CRM automation need, and implementation within one month. Let the agent complete qualification, CRM update, slot selection, booking, confirmation, and call closure.

Evidence Checklist

- ✓ Published Vapi assistant and tools
- ✓ Vapi web/simulated call
- ✓ n8n workflow and executions
- ✓ HubSpot contact
- ✓ Google Calendar meeting
- ✓ Confirmation email

✓ GitHub repository with documentation and exports
